### **DETAILED ACTION**

1. This Office Action follows a response filed on December 22, 2006. Claims 1-4, 10 and 11 have been amended; claims 16-35 have been cancelled; claims 26-55 have been added.
2. Claims 5-9 and 12-22 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim.
3. In view of the Declaration the rejection of claims 1-4, 10 and 11 under 35 U.S.C. 102(b) as being anticipated by Yamago et al. has been withdrawn.
4. In view of the remarks the rejection of claim 3 under 35 U.S.C. 112, 2<sup>nd</sup> paragraph has been withdrawn.
5. Claims 1-4, 10 and 11 are active.

### ***Claim Objections***

6. Claim 3 is objected to because of the following informalities:

Claim 3 recites the limitation 'obtainable". This rationale is applicable to polymer "obtainable" by a stated process because any variation in any parameter within the scope of the claimed process would change the polymer produced. One who made or used a polymer made by a process other than the process cited in the claim would have to produce a polymer using all possible parameters within the scope of the claim, and then extensively analyze each product to determine if this polymer was obtainable by a process within the scope of the claimed process. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 1-4, 10 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims recite "...that R<sup>2</sup> and R<sup>3</sup> are not simultaneously a hydrogen atom". This negative limitation is not supported by the specification as filed, although Applicants contend that amended claim is clearly supported by the specification (page 7, 2<sup>nd</sup> paragraph).

***Response to Arguments***

8. It is noted that according USPTO practice a claim, which recites the limitation 'obtainable' should be objected. Therefore, appropriate correction is required.
9. As it was above mentioned, the rejection of claims 1-4, 10 and 11 under 35 U.S.C. 102(b) as being anticipated by Yamago et al. has been withdrawn in view of the Declaration.

Art Unit: 1713

10. It is further noted that the rejection of claims 1-4, 10 and 11 under 35 U.S.C. 102(b) as being anticipated by Kanda et al. will be reinstated when new subject matter is withdrawn.

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
